W. AVERELL HARRIMAN, Secretary

NATIONAL BUREAU OF STANDARDS

E. U. CONDON, Director

INSECT WIRE SCREENING

COMMERCIAL STANDARD CS138-47

Effective Date for New Production From January 2, 1947

A RECORDED VOLUNTARY STANDARD OF THE TRADE

UNITED STATES
GOVERNMENT PRINTING OFFICE
WASHINGTON : 1947

PROMULGATION
of
COMMERCIAL STANDARD CS138-47
for
INSECT WIRE SCREENING

On February 23, 1945, at the instance of the Insect Wire Screening Bureau, a meeting of producers of insect wire screening adopted the proposed commercial standard for this commodity. This was submitted on March 28, to leading manufacturers, interested Government agencies, distributor and user organizations for constructive comment. Following adjustment in the light of the comment received, the recommended commercial standard was circulated for written acceptance on July 16, 1945.

Those concerned have since accepted and approved the standard as shown herein for promulgation by the United States Department of Commerce, through the National Bureau of Standards.

The standard is effective for new production from January 2, 1947.

Promulgation recommended.

F. W. Reynolds,
Acting Chief, Division of Trade Standards.

Promulgated.

E. U. Condon,
Director, National Bureau of Standards.

Promulgation approved.

W. Averell Harriman,
Secretary of Commerce.

Project Manager: E. C. Barrett, Division of Trade Standards.
Technical Adviser: Dr. L. V. Judson, Metrology Division.

INSECT WIRE SCREENING

COMMERCIAL STANDARD CS138-47

PURPOSE

1. The purpose of this commercial standard is to provide a nationally recognized standard of quality of insect wire screening. It will assist ultimate consumers in determining what sizes and types of insect wire screening are standard with the industry; and to promote fair marketing practices and a better understanding between manufacturers, distributors, and consumers of insect wire screening.

SCOPE

2. This standard describes the nomenclature, definitions and general requirements for commercial standard insect wire screening designed and woven primarily for installation in or on, any dwelling, building, or structure, for the purpose of preventing the ingress of flies, mosquitoes, or other insects. A recommended form for guaranteeing compliance with this standard is included.

DEFINITIONS

3. *Insect wire screening*.— 16×16 , 18×14 , and 18×18 mesh woven wire screening (carbon steel, commercial bronze, and copper), for protection against mosquitoes as well as flies and larger insects. (See par. 9.)

4. *Galvanized steel wire screening*.— 16×16 , 18×14 , and 18×18 mesh carbon steel insect wire screening for protection against mosquitoes as well as flies and larger insects. (See par. 9.) The metal used for the coating shall be zinc of at least 98 percent purity.

5. *Bronze screening*.— 16×16 , 18×14 , and 18×18 mesh "commercial bronze" insect wire screening for protection against mosquitoes as well as flies and larger insects; woven from wire containing 89 to 91 percent of copper and the remainder zinc; lead or iron occurring as impurities shall not exceed 0.05 percent each. (See par. 9.)

6. *Copper screening*.— 16×16 , 18×14 , and 18×18 mesh copper insect wire screening for protection against mosquitoes as well as flies and larger insects; woven from wire containing at least 99.8 percent of copper. (See par. 9.)

7. *Mesh*.—Mesh is the width of one opening plus the thickness of one wire; alternatively considered as being the distance from the center of one wire to the center of the next adjacent wire. The technical designation of the mesh count of insect wire screening is the number of meshes per linear inch, counted in the direction of both the warp and

the filler wires. When used as a common designation of the "mesh size" of insect wire screening, the word "mesh" is generically accepted as meaning the number of open spaces per linear inch in both warp and filler directions.

MATERIAL AND WORKMANSHIP

8. All standard wire screening shall be made of high-grade materials and with good workmanship. It shall be free from any defects that might affect its serviceability or its appearance. Well-made splices not over three-fourths of an inch long and showing no tails are permissible at any point of any individual wire, provided, however, that the number of splices shall not exceed 30 in any stock roll nor two splices in any 1 square foot of finished screening.

GENERAL SPECIFICATIONS

9. The mesh counts, sizes and kinds of wire, and types or character of finishes for standard insect wire screening shall be as shown in table 1.

TABLE 1.—*Insect wire screening*

Metal	Mesh			Diameter of wire	Finish
Steel.....	16 × 16	18 × 14	18 × 18	<i>Inches</i> 0.011	Galvanized.
Commercial bronze.....	16 × 16	18 × 14	18 × 18	.011	Bright or antique (dark).
Copper.....	16 × 16	18 × 14	18 × 18	.011	Do.

WIDTHS

10. The stock widths of all types of standard insect wire screening shall be 24, 26, 28, 30, 32, 36, 42, 48 inches.

ROLL LENGTH

11. All standard stock rolls of insect wire screening shall be 100 linear feet in length; shall contain not more than two pieces per roll, and no piece shall be less than 10 linear feet in length.

MESH COUNT

12. Accuracy of mesh count in the direction of the warp or filler wires shall be determined by counting the mesh openings for any interval of one continuous linear foot and dividing the result by 12.

WIRE DIAMETER

13. Accuracy of the wire diameter of steel insect wire screening shall be determined by computing the average of the measured diameter of not less than 10 warp wires together with the same number of filler wires, taken at random from the finished screening, but with all coating or surface finish (if any) entirely removed.

13a. In commercial bronze and copper insect wire screening the same diameter of wire shall be used for both the warp and the filler, and accuracy of the wire diameter shall be determined by computing

separately the average measured diameter of not less than 10 warp wires and of the same number of filler wires taken at random from the finished screening.

13b. For standard galvanized insect wire screening a size of wire may be used for the warp that is different from that (size) employed for the filler; such variations in size, however, shall not be excessive, and in all cases the average diameter of warp and filler wires for galvanized steel insect wire screening shall be 0.011 inch. For all standard commercial bronze and copper insect wire screening, the same wire diameter (0.011 inch) shall be used for both the warp and the filler.

SELVAGES

14. *Selva*ge.—There shall be one (1) or more wires in both selva

edges of all standard insect wire screening.

TOLERANCES

15. Permissible variations shall be:

(a) For wire diameters: 0.0005-inch, plus or minus.

(b) For mesh count:

Warp, one-quarter mesh per linear inch, plus or minus.

Filler, one-half mesh per linear inch, plus or minus.

(c) For width: plus or minus $\frac{1}{8}$ inch.

(d) For length: minus 2 inches.

PACKAGING

16. Unless otherwise specified, standard insect wire screening shall be enclosed in such standard commercial containers, or wrapping, as will insure acceptance by common or other carriers for safe transportation to the ultimate point of delivery, at the lowest applicable rate.

LABELING

17. The mesh count, size, kind and finish of wire, the length and width of the screening enclosed, shall be shown in a conspicuous place, preferably by means of a printed label, on the outside wrapping or covering of each roll of standard insect wire screening.

GUARANTEE

18. In order to assure the purchaser that he is receiving insect wire screening that complies with the requirements of this standard, it is recommended that the label on each roll carry the following guarantee:

We hereby guarantee that this insect wire screening complies with all requirements of Commercial Standard CS138-47, as issued by the National Bureau of Standards of the United States Department of Commerce.

(Signed)

EFFECTIVE DATE

19. The standard is effective for new production from January 2, 1947.

STANDING COMMITTEE

20. The following individuals comprise the membership of the standing committee, as appointed by the National Bureau of Standards. This committee is to review, prior to circulation for acceptance, revisions proposed to keep the standard abreast of progress. Each organization nominated its own representative. Comment concerning the standard and suggestions for revision may be addressed to any member of the committee or to the Division of Trade Standards, National Bureau of Standards, which acts as secretary for the committee.

 C. C. KIKER, Tennessee Valley Authority, Wilson Dam, Ala. (Representing The American Public Health Assn.)

HISTORY OF PROJECT

21. On September 26, 1944, the Insect Wire Screen Cloth Bureau requested the cooperation of the National Bureau of Standards in the establishment of a commercial standard for insect wire screening. A preliminary draft of the proposed commercial standard was submitted to manufacturers for their review and comment. All comment was carefully considered at a meeting held in New York City on February 23, 1945. An adjusted draft was then prepared and submitted on March 28, 1945, to technical organizations, Government agencies, testing laboratories, manufacturers, and wholesale, retail, and user organizations for further review and comment. The standard was then modified in accordance with composite recommendations of those concerned and circulated on July 16, 1945, to the trade for written acceptance.

22. Upon receipt of official acceptances estimated to represent a satisfactory majority of the production by volume, and in the absence of active valid opposition, the standard was promulgated on December 2, 1946, as Commercial Standard CS138-47.

ACCEPTANCE OF COMMERCIAL STANDARD

If acceptance has not previously been filed, this sheet properly filled in, signed, and returned will provide for the recording of your organization as an acceptor of this commercial standard.

Date _____

Division of Trade Standards,
National Bureau of Standards,
Washington 25, D. C.

Gentlemen:

We believe that the Commercial Standard CS138-47 constitutes a useful standard of practice, and we individually plan to utilize it as far as practicable in the

production ¹ distribution ¹ purchase ¹ testing ¹
of insect wire screening.

We reserve the right to depart from it as we deem advisable.

We understand, of course, that only those articles which actually comply with the standard in all respects can be identified or labeled as conforming thereto.

Signature of authorized officer _____
(In ink)

(Kindly typewrite or print the following lines)

Name and title of above officer _____

Organization _____
(Fill in exactly as it should be listed)

Street address _____

City, zone, and State _____

¹ Underscore which one. Please see that separate acceptances are filed for all subsidiary companies and affiliates which should be listed separately as acceptors. In the case of related interests, trade associations, trade papers, etc., desiring to record their general support, the words "General Support" should be added after the signature.

TO THE ACCEPTOR

The following statements answer the usual questions arising in connection with the acceptance and its significance:

1. *Enforcement.*—Commercial standards are commodity specifications voluntarily established by mutual consent of those concerned. They present a common basis of understanding between the producer, distributor, and consumer and should not be confused with any plan of governmental regulation or control. The United States Department of Commerce has no regulatory power in the enforcement of their provisions, but since they represent the will of the interested groups as a whole, their provisions through usage soon become established as trade customs; and are made effective through incorporation into sales contracts by means of labels, invoices, and the like.

2. *The acceptor's responsibility.*—The purpose of commercial standards is to establish for specific commodities, nationally recognized grades or consumer criteria and the benefits therefrom will be measurable in direct proportion to their general recognition and actual use. Instances will occur when it may be necessary to deviate from the standard and the signing of an acceptance does not preclude such departures; however, such signature indicates an intention to follow the commercial standard where practicable, in the production, distribution, or consumption of the article in question.

3. *The Department's responsibility.*—The major function performed by the Department of Commerce in the voluntary establishment of commercial standards on a Nation-wide basis is fourfold: first, to act as an unbiased coordinator to bring all interested parties together for the mutually satisfactory adjustment of trade standards; second, to supply such assistance and advice as past experience with similar programs may suggest; third, to canvass and record the extent of acceptance and adherence to the standard on the part of producers, distributors, and users; and fourth, after acceptance, to publish and promulgate the standard for the information and guidance of buyers and sellers of the commodity.

4. *Announcement and promulgation.*—When the standard has been endorsed by a satisfactory majority of production or consumption in the absence of active, valid opposition, the success of the project is announced. If, however, in the opinion of the standing committee or the Department of Commerce, the support of any standard is inadequate, the right is reserved to withhold promulgation and publication.

ACCEPTORS

23. The organizations listed below have individually accepted these grading rules for use as far as practicable in the production, distribution, testing, or purchase of insect wire screening. In accepting the standard they reserved the right to depart therefrom as they individually deem advisable. It is expected that articles that actually comply with the requirements of this standard in all respects will be regularly identified or labeled as conforming thereto, and that purchasers will require such specific evidence of conformity.

COMMERCIAL STANDARDS

CS No.	Item	CS No.	Item
0-40.	Commercial standards and their value to business (third edition).	55-35.	Mattresses for institutions.
1-42.	Clinical thermometers (third edition).	56-41.	Oak flooring (second edition).
2-30.	Mopsticks.	57-40.	Book cloths, buckrams, and impregnated fabrics for bookbinding purposes except library bindings (second edition).
3-40.	Stoddard solvent (third edition).	58-36.	Woven elastic fabrics for use in overalls (overall elastic webbing).
4-29.	Staple porcelain (all-clay) plumbing fixtures.	59-44.	Textiles—testing and reporting (fourth edition).
5-46.	Pipe nipples; brass, copper, steel and wrought-iron (second edition).	60-36.	Hardwood dimension lumber.
6-31.	Wrought-iron pipe nipples (second edition). Superseded by CS5-46.	61-37.	Wood-slat venetian blinds.
7-29.	Standard weight malleable iron or steel screwed unions.	62-38.	Colors for kitchen accessories.
8-41.	Gage blanks (third edition).	63-38.	Colors for bathroom accessories.
9-33.	Builders' template hardware (second edition).	64-37.	Walnut veneers.
10-29.	Brass pipe nipples. Superseded by CS5-46.	65-43.	Methods of analysis and of reporting fiber composition of textile products (second edition).
11-41.	Moisture regains of cotton yarns (second edition).	66-38.	Marking of articles made wholly or in part of platinum.
12-40.	Fuel oils (fifth edition).	67-38.	Marking articles made of karat gold.
13-44.	Dress patterns (fourth edition).	68-38.	Liquid hypochlorite disinfectant, deodorant, and germicide.
14-43.	Boys' button-on waists, shirts, junior and sport shirts (made from woven fabrics) (third edition).	69-38.	Pine oil disinfectant.
15-46.	Men's pajamas (made from woven fabrics) (third edition).	70-41.	Phenolic disinfectant (emulsifying type) (second edition) (published with CS71-41).
16-29.	Wall paper.	71-41.	Phenolic disinfectant (soluble type) (second edition) (published with CS70-41).
17-42.	Diamond core drill fittings (third edition).	72-38.	Household insecticide (liquid spray type).
18-29.	Hickory golf shafts.	73-45.	Old growth Douglas fir standard stock doors (third edition).
19-32.	Foundry patterns of wood (second edition).	74-39.	Solid hardwood wall paneling.
20-42.	Staple vitreous china plumbing fixtures (third edition).	75-42.	Automatic mechanical draft oil burners designed for domestic installations (second edition).
21-39.	Interchangeable ground-glass joints, stopcocks, and stoppers (fourth edition).	76-39.	Hardwood interior trim and molding.
22-40.	Builders' hardware (nontemplate) (second edition).	77-40.	Sanitary cast-iron enameled ware.
23-30.	Feldspar.	78-40.	Ground-and-polished lenses for sun glasses (second edition) (published with CS79-40).
24-43.	Screw threads and tap-drill sizes.	79-40.	Blown, drawn, and dropped lenses for sun glasses (second edition) (published with CS78-40).
25-30.	Special screw threads. Superseded by CS24-43.	80-41.	Electric direction signal systems other than semaphore type for commercial and other vehicles subject to special motor vehicle laws (after market).
26-30.	Aromatic red cedar closet lining.	81-41.	Adverse-weather lamps for vehicles (after market).
27-36.	Mirrors (second edition).	82-41.	Inner-controlled spotlamps for vehicles (after market).
28-46.	Cotton fabric tents, tarpaulins and covers (second edition).	83-41.	Clearance, marker, and identification lamps for vehicles (after market).
29-31.	Staple seats for water-closet bowls.	84-41.	Electric tail lamps for vehicles (after market).
30-31.	Colors for sanitary ware.	85-41.	Electric license-plate lamps for vehicles (after market).
31-38.	Wood shingles (fourth edition).	86-41.	Electric stop lamps for vehicles (after market).
32-31.	Cotton cloth for rubber and pyroxylin coating.	87-41.	Red electric warning lanterns.
33-43.	Knit underwear (exclusive of rayon) (second edition).	88-41.	Liquid-burning flares.
34-31.	Bag, case, and strap leather.	89-40.	Hardwood stair treads and risers.
35-42.	Plywood (hardwood and eastern red cedar) (second edition).	90- .	(Reserved for power shovels and cranes.)
36-33.	Fourdrinier wire cloth (second edition).	91-41.	Factory-fitted Douglas fir entrance doors.
37-31.	Steel bone plates and screws.	92-41.	Cedar, cypress, and redwood tank stock lumber.
38-32.	Hospital rubber sheeting.	93-41.	Portable electric drills (exclusive of high frequency).
39-37.	Wool and part wool blankets (second edition). (Withdrawn as commercial standard, July 14, 1941.)	94-41.	Calking lead.
40-32.	Surgeons' rubber gloves.	95-41.	Lead pipe.
41-32.	Surgeons' latex gloves.	96-41.	Lead traps and bends.
42-43.	Structural fiber insulating board (third edition).	97-42.	Electric supplementary driving and passing lamps for vehicles (after market).
43-32.	Grading of sulphonated oils.	98-42.	Artists' oil paints.
44-32.	Apple wraps.	99-42.	Gas floor furnaces—gravity circulating type.
45-45.	Douglas fir plywood (sixth edition).	100-44.	Porcelain-enameled steel utensils (second edition).
46-40.	Hosiery lengths and sizes (third edition).	101-43.	Flue-connected oil-burning space heaters equipped with vaporizing pot-type burners.
47-34.	Marking of gold-filled and rolled-gold-plate articles other than watchcases.	102- .	(Reserved for Diesel and fuel-oil engines).
48-40.	Domestic burners for Pennsylvania anthracite (underfeed type) (second edition).	103-42.	Cotton and rayon velour (jacquard and plain).
49-34.	Chip board, laminated chip board, and miscellaneous boards for bookbinding purposes.	104-46.	Warm-air furnaces equipped with vaporizing pot-type oil burners (second edition).
50-34.	Binders board for bookbinding and other purposes.		
51-35.	Marking articles made of silver in combination with gold.		
52-35.	Mohair pile fabrics (100-percent mohair plain velvet, 100-percent mohair plain frieze, and 50-percent mohair plain frieze).		
53-35.	Colors and finishes for cast stone.		
54-35.	Mattresses for hospitals.		

CS No.	Item	CS No.	Item
105-43.	Mineral wool; loose granulated, or felted form, in low-temperature installations.	122-45.	Western hemlock plywood.
106-44.	Boys' pajama sizes (woven fabrics) (second edition).	123-45.	Grading of diamond powder.
107-45.	Commercial electric-refrigeration condensing units (second edition).	(E)124-45. ¹	Master disks.
108-43.	Treading automobile and truck tires.	125-45.	Prefabricated homes.
109-44.	Solid-fuel-burning forced-air furnaces.	126-45.	Tank mounted air compressors.
